HOLD YOUR BREATH

There is a very large mortality in transplanted perennials, too large. Among the factors responsible for this are improper handling at the source, improper preparation for shipping and improper care when received and planted; but by far the worst factor is our impatience to get the plants in the ground in the spring; we must admit we are subject to this spring fever and have paid heavily for it; it's a good plan to order early, prepare your ground and then count ten (or more) and wait until the ground is dried out a bit and the sun has had a chance to warm it up; plants put in the ground on May first will mature sooner and blossom more freely than those planted on April first; better still, plant in the fall.

Paramount Gardens

PLAINFIELD, N. J.

This catalog is worth reading thru from first to last. It is not possible to emphasize on the first page all the exceptional items it contains and there are more unusual and choice rock garden plants listed herein than in any other catalog of its kind.

We wish to emphasize the fact that all the plants listed are hardy anywhere in this country and very few are difficult. We have many choice perennials in our exhibition garden which we do not list and we extend a cordial invitation to come and see them at any time.

We guarantee safe delivery in good condition.

Three plants of one variety may be ordered for 2½ times the unit price; five plants of one variety for the price of four.

The PARAMOUNT Collection of
ten best Perennials.

Collection No. 3

For Rock or Wall Garden

We realize that the 'best' in anything is largely a matter of personal choice and that considered singly one might not agree with us, but considered collectively we believe this list can hardly be surpassed.

We have taken into consideration variety of foliage, habit, time and length of bloom, variety of color and form, floriferousness, and ease of cultivation and from this angle the collection leaves little to be desired.

We cannot substitute any of the items.
